Address
Erode, TamilNadu

Expertise

AI Automation

Languages: JavaScript (ES6+), Python, HTML5, CSS3, C++, Java

Backend: Node.js, Express.js, RESTful API Integration, WebSockets

Frontend: React.js, JavaScript DOM, Responsive Design, CSS3 Layouts

Database & Tools: Git, GitHub, Postman, VS Code, JSON, REST APIs

AI Tools: ChatGPT, AI-assisted development workflows, Prompt Engineering

Concepts: Agile Collaboration, Debugging, Performance Optimization, Code Versioning

Language

English(Professional)

Tamil(Native)

About

B.Tech CSE (AI & ML) student with hands-on experience in full-stack web development and AI-assisted applications. Passionate about building user-focused solutions, exploring emerging technologies, and solving real-world problems through code.

Elango S

Web Developer | Full Stack Enthusiast

Projects

KalviLearn – Coding Learning & Practice Platform

Developed a coding-learning platform designed to help students learn programming through structured modules, interactive coding practice, and progress tracking. Implemented role-based access for Super Admins, Campus Managers, Mentors, and Students, along with a Monaco-based code editor supporting Python, C++, Java, and JavaScript. Integrated automated test-case evaluation, learning progress tracking, coding streaks, and a revision system to support continuous learning.

Zyrocore – E-commerce Fashion Platform

Developed a modern e-commerce platform for Zyrocore, an Indian streetwear and timeless apparel brand. Implemented product browsing, size-based inventory management, shopping cart, secure checkout, Razorpay payment integration, and an admin dashboard for managing products, orders, and stock. Focused on creating a responsive, user-friendly shopping experience.

TeamSync Workspace – Collaborative Project Management Platform

Developed a collaborative workspace platform to simplify team communication, project planning, and task management. Implemented workspace creation, team member management, project organization, task assignment, and progress tracking, enabling teams to coordinate work efficiently through a centralized platform. Designed a responsive and user-friendly interface to support seamless collaboration and productivity.

SmartTravel — Full-Stack Travel Booking & Management Platform

Developed a full-stack travel platform featuring flight and hotel search, live flight tracking, dynamic pricing, price freeze, seat and room selection, booking management, Razorpay payment integration, cancellation and refund workflows, reviews and ratings, and personalized recommendations. Implemented secure authentication, role-based authorization, atomic inventory management, real-time WebSocket updates, and responsive interfaces optimized for web and mobile. Conducted comprehensive code audits, performance testing, concurrency validation, and production build verification to improve reliability, security, and maintainability.
Tech Stack: React.js, TypeScript, Spring Boot, Java, MongoDB, WebSockets, Razorpay, Three.js, JWT, Google OAuth, Vite

Key Strength

- Quick Learner – Adaptable and enthusiastic about learning new technologies, frameworks, and development tools.
- Problem Solving – Analytical approach to debugging, identifying root causes, and developing efficient solutions.
- Full-Stack Development – Comfortable working across frontend and backend technologies to build functional, responsive applications.
- AI & Innovation – Interested in AI-assisted development, automation, and applying emerging technologies to real-world problems.
- Team Collaboration – Effective in collaborative development environments, with experience working in teams and contributing to shared projects.
- Adaptability – Able to adjust to evolving project requirements and explore new approaches to development.
